Profile

3rd-year Information Technology and Business Analytics student with hands-on experience in market analysis, growth strategy, and international partnerships. Used data and structured thinking to support expansion across multiple markets and improve performance. Interested in technology consulting and roles that combine business understanding with analytical problem solving.

Professional Experience

B2B Partnership Lead, Declic App

Apr 2025 – Mar 2026

- Led international B2B partnerships and sponsor acquisition, securing 80+ partners across 7 countries (MENA, Europe, Africa).
- Supported market expansion by analyzing target markets and defining entry strategies adapted to each region.
- Designed and executed growth initiatives that increased platform reach by 160%.
- Conducted market and customer analysis to identify opportunities and improve targeting across segments.
- Prepared partnership pitches, proposals, and communication materials for external stakeholders.
- Contributed to strategic decisions using performance tracking and data-driven insights.

Marketing & Game Content Assistant, WeaveLines Production

Oct 2025 – Dec 2025

- Contributed to go-to-market strategy for the game Damdoun, supporting positioning and audience targeting.
- Conducted market and user research to refine product direction and engagement strategy.
- Collaborated on content development and storytelling aligned with user experience goals.

IT Intern, Tunisie Télécom

Jul 2025 – Aug 2025

- Gained exposure to IT infrastructure, cybersecurity practices, and system maintenance operations.
- Analyzed internal workflows (HR, finance, commercial) through Oracle-based systems.
- Supported access control management, system updates, and basic web maintenance tasks.

Digital Marketing Intern, 360° Marketing Agency

Aug 2024 – Oct 2024

- Supported campaign execution and monitored performance metrics to improve engagement.
- Assisted in content strategy and digital communication for client accounts.

Vice President of Marketing, ATLAS Future Leaders (TBS Chapter)

Nov 2023 – Jun 2024

- Led marketing strategy for large-scale events (hackathons, bootcamps, exhibitions).
- Increased audience reach by seven times using strategic content and ads.
- Managed social platforms and content creation.
- Developed sponsorship documents and B2B proposals.

Leadership & Activities

Marketing Mentor, ATLAS TBS Chapter

Sep 2024 – Present

Supervised the marketing department and ensured content quality. Conducted research to optimize campaigns based on Meta algorithms. Co-managed the 2025 Job Fair, supervising a team of 20 members.

Founding Member, IEEE TBS Student Branch

2025 – Present

Participated in conferences and technical events focused on computer science and emerging technologies. Contributed to project management and logistics for events and initiatives. Engaged in continuous learning in software, systems, and technology-related topics.

Member, MERIT TBS

Oct 2023 – Jun 2025

Created marketing content for tech-focused events. Participated in web development workshops. Contributed to cybersecurity content awareness.

Marketing Member, 3Zero TBS Club

Oct 2023 – Jun 2024

Created graphic and video content. Worked on sustainable project concepts aligned with SDGs. Organized awareness campaigns on campus.

IT & Data Projects

Docent – Smart Museum Agent System

REST APIs, AI, System Design

- Designed and developed a REST API-based system modeling museum operations and visitor journeys
- Integrated geolocation, security logic, and an AI-driven recommendation engine to personalize user experiences
- Proposed a business model for autonomous, guide-free museum navigation and learning

Flexi-Income Intelligence Suite (BI Project)

Python, SQLite, Power BI

- Built an end-to-end BI solution analyzing income stability and risk in the gig economy

- Designed a dimensional star schema and implemented an ETL pipeline using Python (pandas)
- Developed interactive dashboards in Power BI (DAX) for executive insights
- Identified that income behavior (volatility, gaps) is more predictive than total earnings

L2R – Mobile Games Market Analysis

R, PCA, Clustering

- Analyzed 18,000+ mobile apps to identify success drivers for game developers
- Applied PCA and K-Means clustering to uncover market segments and positioning strategies
- Found that price has minimal correlation with user ratings

Sentinel – AI Career Agent

Next.js, n8n, APIs, AI

- Developed an AI-powered agent to support student career planning
- Integrated automation workflows using n8n and external APIs
- Built a front-end interface and implemented AI-based recommendation logic

SideQuest – Mobile Application

Kotlin

- Developed a mobile app focused on gamified life progression and task management
- Designed user flows to enhance engagement and usability
